1 Introduction

We are very pleased to announce the latest release of Votiro SaaS version 24.07.21. This version contains important enhancements to our product!

2 New Features

The following new features and improvements are added to this version of Votiro SaaS.

2.1 Privacy and Compliance Dashboard

Privacy & Compliance dashboard now supports data type drill-down.

Sensitive Files per Data Type PII 991 PHI 14 PCI 5	lick on one of the data type will drill down to relevant events			Geo Emails		
Top Sensitive Users	Top Sensitive Files			O Emails	5.5% Sensitive	
	By regulation	By entity label	By file type	🏟 AWS 53

2.4 File type support

Our product now supports WebP file detection.

3 Resolved Issues

The following open issues have been resolved in this latest version release:

- URL Protection Major bug fixes
- Resolved an issue where the "From" email address wasn't displayed in the Release Unmasked File screen.
- Resolved an issue where the password-protected portal had endless spinning in case of an error.
- Resolved a few issues in our filter by channel capabilities in Privacy and Threat dashboards.
- Resolved an issue where "Return by mail" wasn't working properly in the Office365 case.
