1 Introduction

We are very pleased to announce the latest release of Votiro Browser Plugin. This version contains important enhancements to our product!

2 New Features

The following new features and improvements are added to this version of Votiro Browser Plugin.

2.1 Version 1.2.8

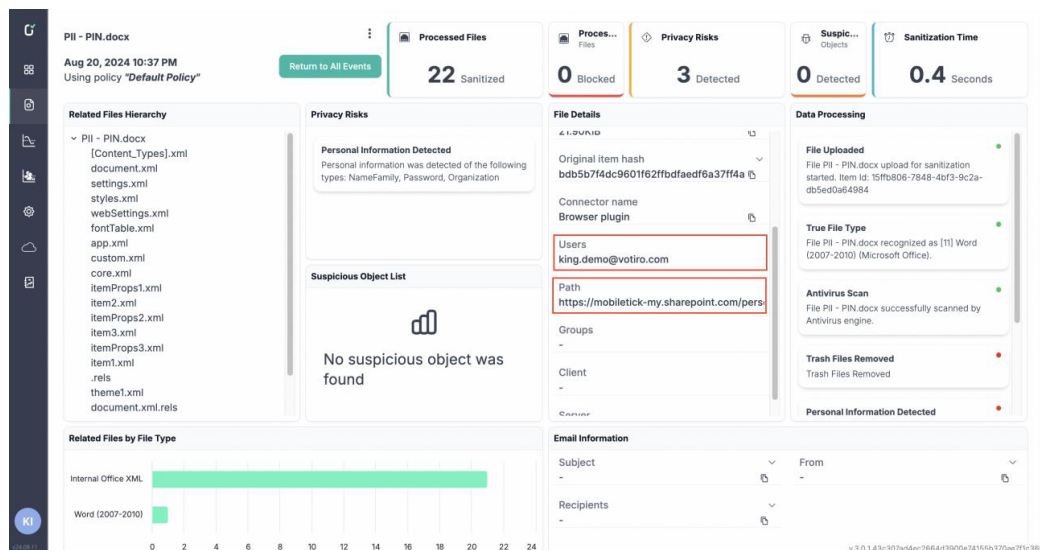

- Improved support for a broader range of whitelisted domains, including complex subdomains and custom ports

2.2 Version 1.2.6

- Resolved an issue where files were not whitelisted after configuring a whitelist of subdomains.
- Resolved an issue where the progress bar froze and files could not be downloaded due to a very long file path.

2.3 Version 1.2.4

- **Enhanced context identifiers for download request** - In our latest product enhancements, our product now displays machine information on each file downloaded from the web. This information will assist security teams by reducing investigation time and analysis procedures by finding which users encountered suspicious or privacy activity.

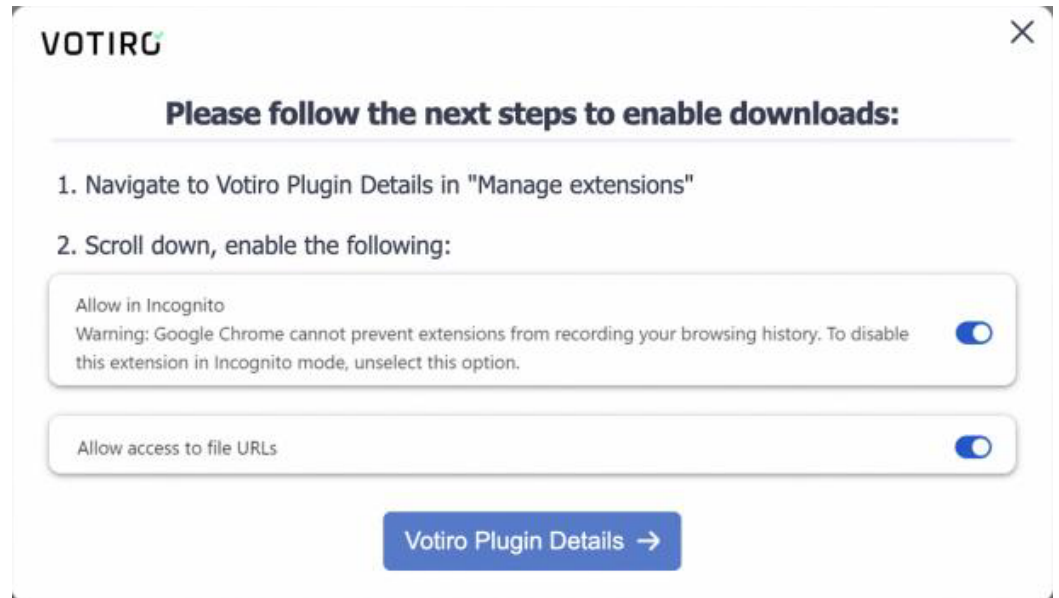

- Resolved an issue where files could not be downloaded if Incognito mode was disabled by GPO, but the browser still displayed a pop-up of "Enable Incognito".

2.4 Version 1.2.3

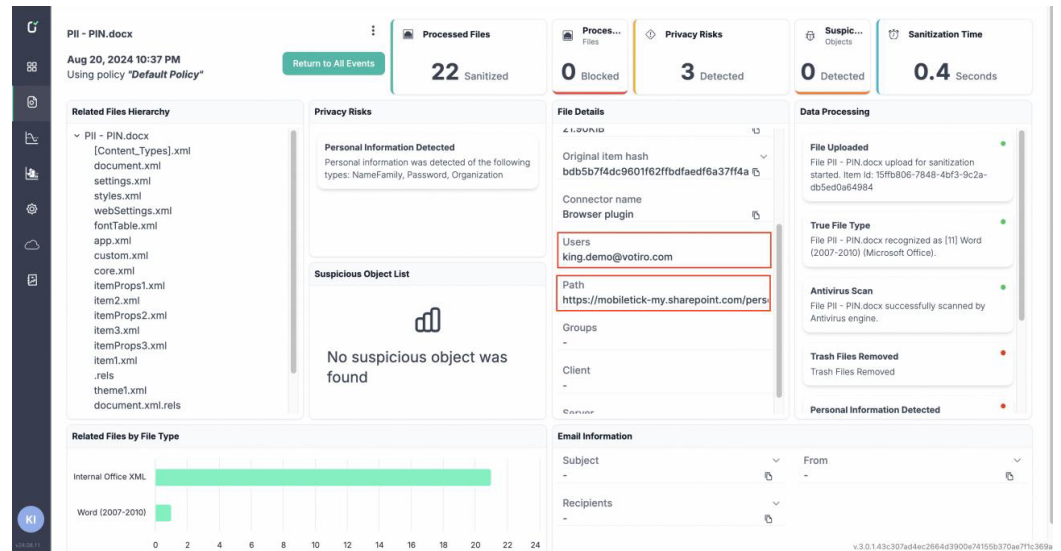

- **Secure downloads for Incognito mode** - Our product now ensures holistic secure downloading for Incognito file downloads also. Our Browser plugin now enforces enablement for Incognito files downloads to make sanitization work.

Note:

When deploying the new version, each end user will need to enable Incognito mode to be able to download files while using the Browser plugin. Because this may disrupt the workflow, it should be taken into account by the organization.

- **Secure downloads for MacOS** - Our Browser plugin is now officially supported for MacOS also. MacOS users can now download files without any risk while using the Votiro Browser plugin.
- **Added Context identifiers for download request** - Our product now presents important identity context for each file download from the web. This information will assist security teams by determining which users were involved with suspicious or privacy activity, thus reducing the time required for investigation and analysis.

2.5 Version 1.18

Resolved an issue where the progress bar was still displayed after canceling the file download

2.6 Version 1.17

Fixed and improved Large-files downloads

2.7 Version 1.16

Fixed and improved Audit mode and Fail-open downloads
