1 Supported File Types

The File Types table lists the file types and attributes supported by Votiro On-prem. The information is arranged according to the categories that appear in the **Action by File Type** area of the **Policies** page in the Votiro Management Dashboard.

- Types marked with ^ are scanned by the Positive Selection® Engine and their true file type is verified based on their structure. The files are not modified by this process. To allow files that have only detection, go to the [Policies](#) dashboard and create an exception under **Other files**. For more information, see [Adding Policy Exceptions](#).
- Types marked with ** are obsolete. They are not recommended as filters in a production environment. Support for these types might be discontinued in a later version.
