1 Introduction

We are very pleased to announce the latest release of Votiro SaaS version 23.09.18. This version contains important enhancements to our product!

2 New Features

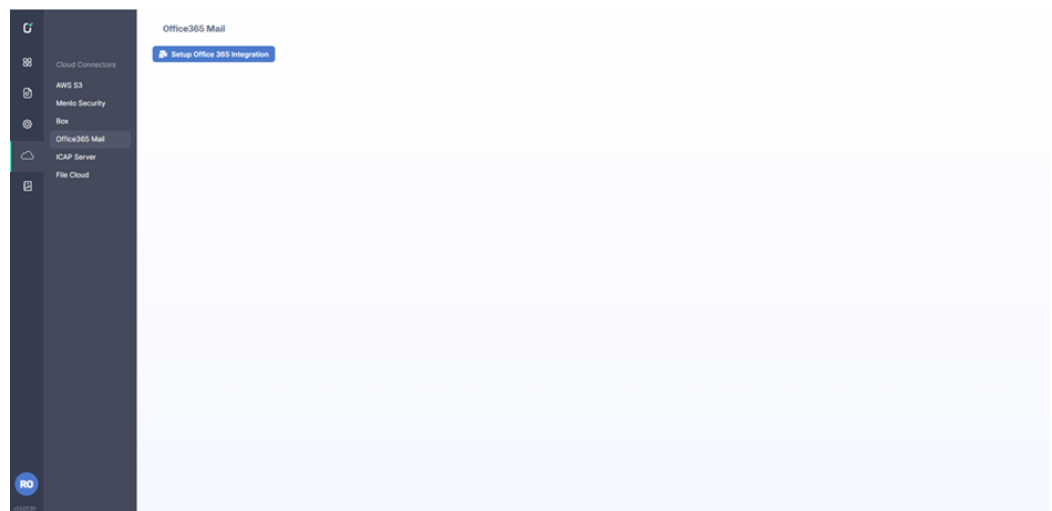

The following new features and improvements are added to this version of Votiro SaaS.

2.1 Office 365 - Easy integration

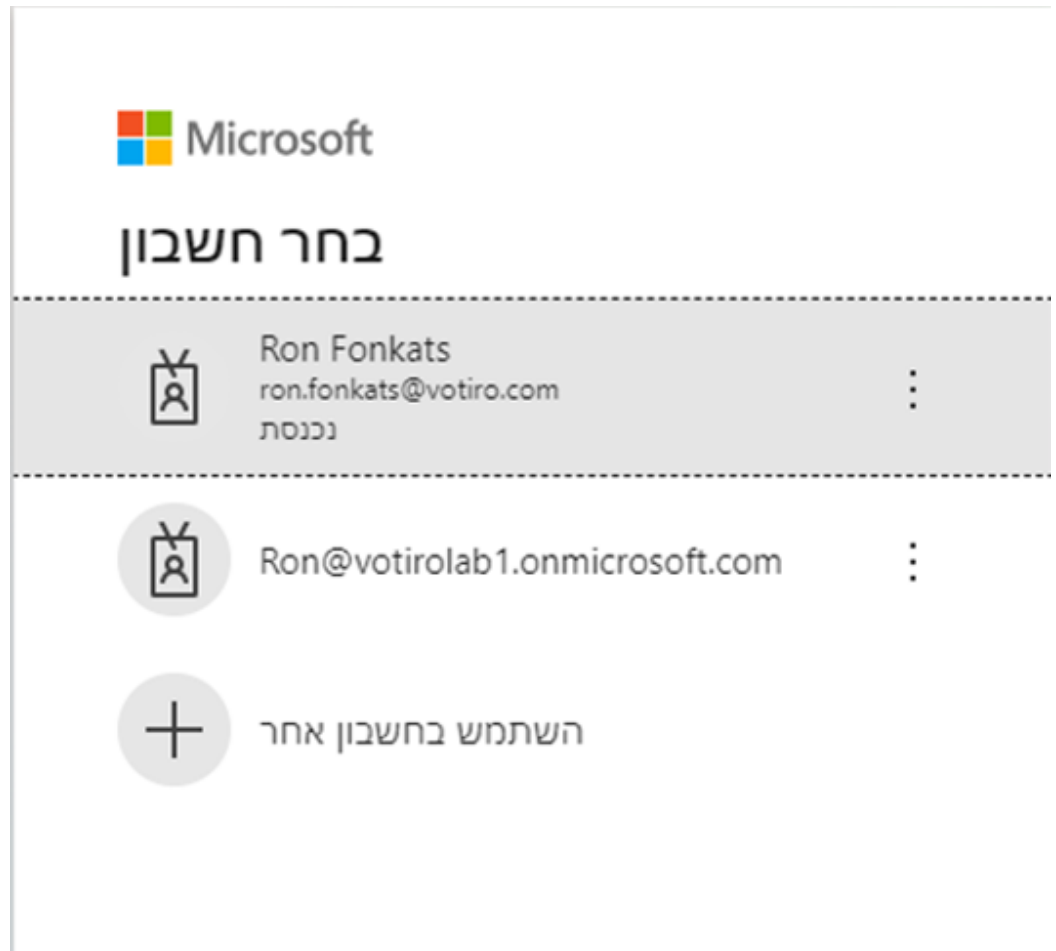

After getting feedback from our sales team and customers to improve our Office 365 integration, we built an amazing new integration to Office 365. With a few clicks, the integration is set. Like magic!

The integration is accomplished in four steps:

1. Set up Office 365 integration through our management console.

2. Authorize with an Admin account.

3. Request and receive permissions.

Not Verified

This app is not sponsored by Microsoft or your organization.

This application requests:

- ✓ Sign in and read user profile
- ✓ Read all groups
- ✓ Read all users' full profiles
- ✓ Read and write mail in all mailboxes
- ✓ Send mail as any user
- ✓ Read directory data
- ✓ Read all group memberships

If you agree, this app will have access to the specified resources for all users in the organization. No one else will be notified to review these permissions.

Accepting these permissions means that you allow this application to use data as specified in the terms of service and the publisher's privacy policy. **The advertiser did not provide links to its terms for review.** You can change these permissions at <https://myapps.microsoft.com>. 4. The Office 365 Mail dashboard is displayed:

The screenshot shows the 'Office365 Mail' configuration page. On the left is a dark sidebar with navigation icons and labels: Cloud Connectors, AWS S3, Merio Security, Box, Office365 Mail (highlighted), ICAP Server, and File Cloud. At the bottom of the sidebar is a blue circle with 'RO' and a timestamp '10:57:30'. The main content area is titled 'Office365 Mail' and contains several form fields: 'Azure Tenant Id' with the value '7e848398-70bd-400c-b8cf-2ab6f30d1b60'; 'Policy Name' with a dropdown menu showing 'King'; 'Channel Name' with a text input containing 'Office 365'; 'Monitored Users' with a list of users (Alex Wilber, Ehud Lederman, Henrietta Mueller) and a 'Remove' button; and 'Monitored Groups' with a list of groups (VotiroLab1Team3, a000000000000000, VotiroLab1Team2) and a 'Remove' button. Each list has an 'Add' button and a 'None' option.

2.2 FileCloud integration

As part of our vision to expand our integrations, we have built a new integration to FileCloud.

FileCloud is a hyper-secure content collaboration platform (CCP) that provides secure file sharing, file sync, and cloud backup solutions for businesses of all sizes.

With this integration, we can offer our security product to companies that use FileCloud as part of their file storage platform.

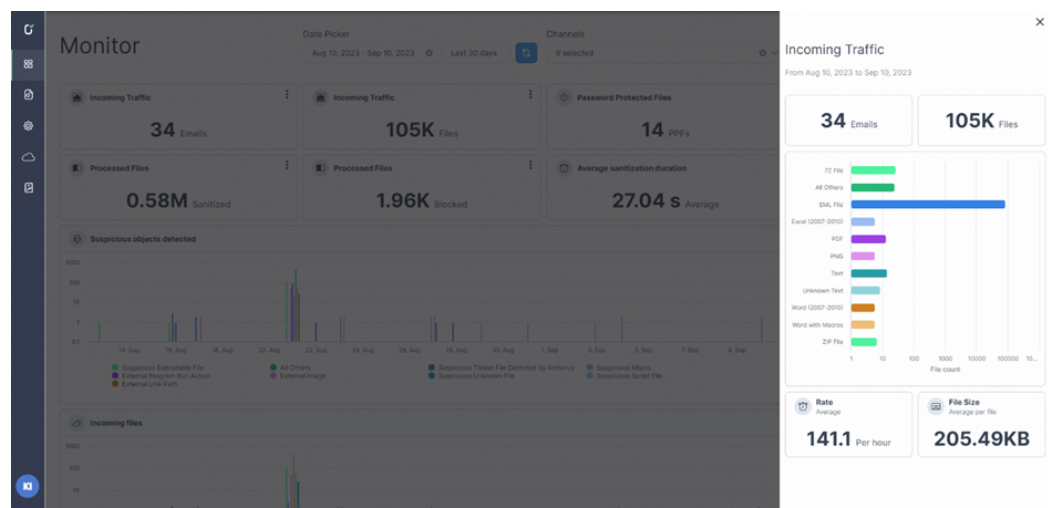

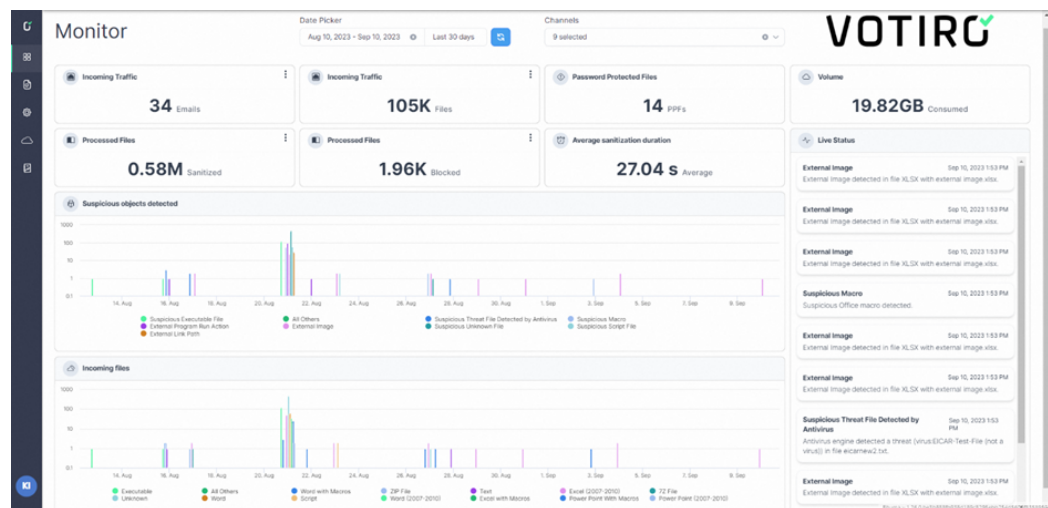

The screenshot shows the 'File Cloud' configuration page. The sidebar is identical to the previous screenshot, with 'File Cloud' highlighted. The main content area is titled 'File Cloud' and contains form fields: 'FileCloud Server Address' with a text input and a 'Server address' label; 'FileCloud API key' with a text input and an 'API key' label; 'Policy Name' with a dropdown menu showing 'King'; and 'Channel Name' with a text input containing 'File Cloud'.

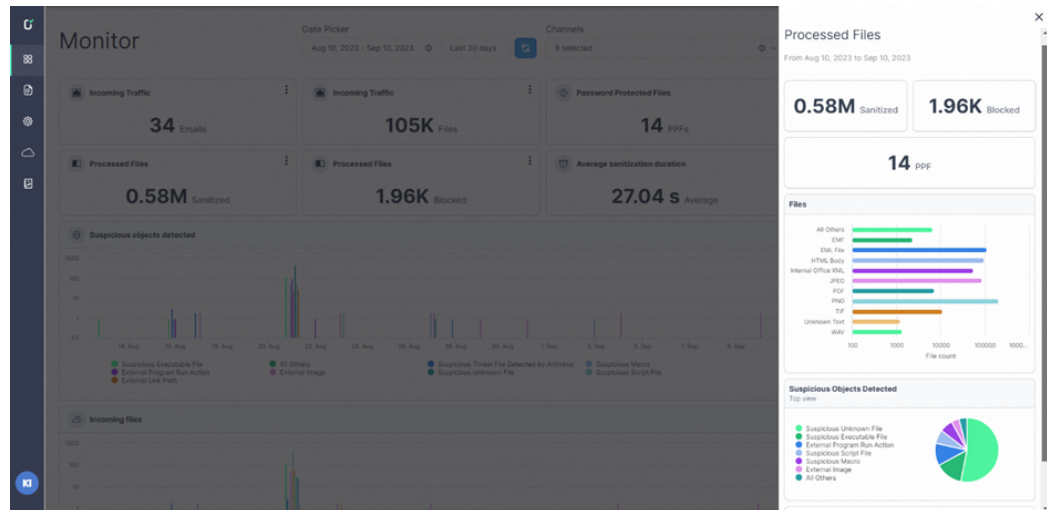

2.3 The new UI – Beta

The beta phase of the new UI will contain a new design for the Monitor & Incidents pages.

2.3.1 Monitor page

- Incoming traffic insights + side panel detailed information
- Processed files insights + side panel detailed information
- Suspicious objects detected timeline graph
- Incoming files timeline graph
- Volume consumed
- Number of password-protected files
- Average sanitization time
- Live status

2.3.2 Incidents page

- New Incidents list view – File information
 - ◆ Total sanitized files
 - ◆ Total suspicious objects detected
 - ◆ Total blocked files
 - ◆ Total sanitization time
- New Filters
 - ◆ File type
 - ◆ Suspicious objects detected
 - ◆ PPF (Password-protected files)
 - ◆ Post process
 - ◆ Release incidents
 - ◆ Retrospective findings
- Sort incidents by date

- ◆ New View file details screen
- ◆ Related file by file type
- ◆ Suspicious object list
- ◆ Related files hierarchy
- ◆ Chip icons for blocked & suspicious files

2.4 New Login

The new login page allows customers to sign in using either of two options:

1. Sign in with Votiro credentials. This option is relevant for customer that have setup local users. The customer can enter his local user email address to sign into the Votiro Management console.

The image shows a Votiro login interface. At the top is the VOTIRO logo with a green checkmark. Below it is the heading "Sign In To Your Account". There is a white input field containing the email address "ron.king@votiro.com". Below the input field is a blue "Sign In" button. At the bottom, there is a link that says "Sign In With SSO".

Sign In With SSO

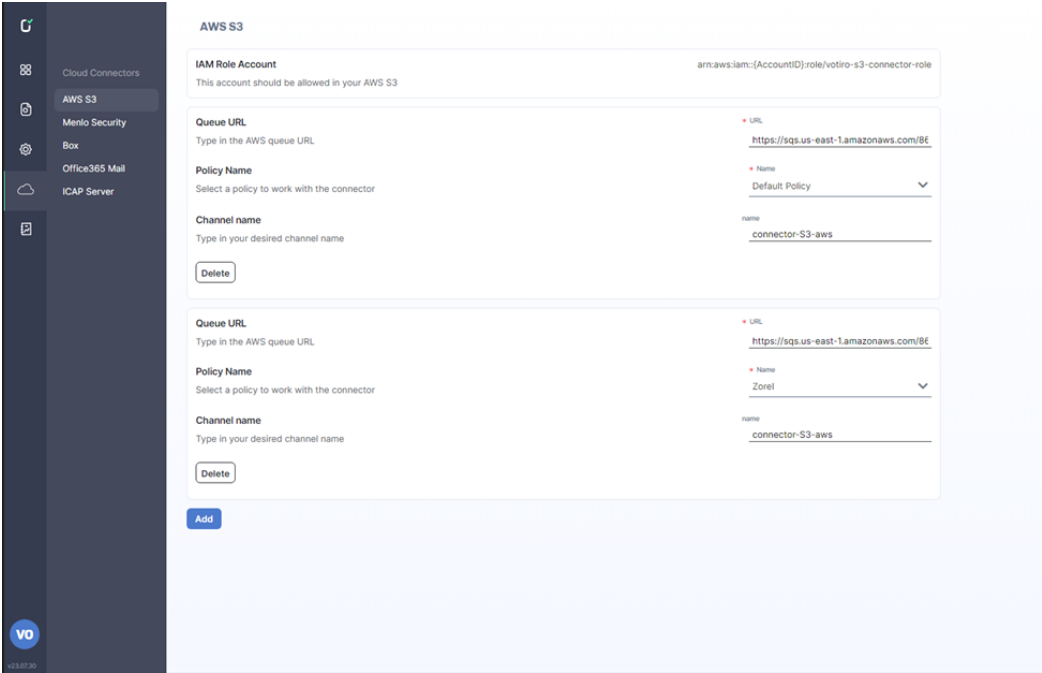

2. Sign in with SSO (using corporate credentials). This option is relevant for customers that have integrated Votiro Cloud through SAML. The customer can enter his corporate credentials to sign in Votiro Management console.

2.5

AWS S3 - Support multiple SQS queues

Our product now supports multiple AWS SQS queues. In our management console, our customers are able to add and manage their multiple SQS queues.

2.6 Apple iWork file type support

Our product now supports detection of iWork file types. iWork is common to both macOS and iOS.

3 Resolved Issues

The following open issues have been resolved in this latest version release:

- Resolved an issue where original and sanitized files cannot be downloaded/ released
- Resolved an issue where large complex files were blocked due to sanitization
- Resolved an issue where some specific Excel files were detected as unknown
- Resolved an issue where random images in a PDF had the wrong orientation
- Resolved an issue where files cannot be uploaded to the MSSP cluster
