1   Introduction

We are very pleased to announce the latest release of Votiro Cloud, version 9.7. The focus of this version has been on improving and expanding existing capabilities and resolving some open issues.

Highlights of new features and improvements in this latest version release include:

- New file type support – Although Votiro file type support is one of the best in the market, our development and research teams keep investing their efforts to add more and more file types based on our customer needs. This release includes over 24 new file types that will make our zero-trust approach even more comprehensive:

    - **Video**:

        AVI, MP4, MPEG, MPG, WMV, M4A, MOV, 3GP, DAT, M4V and MKV

    - **Audio**:

        MP3, WMA and WAV

    - **Image**:

        ICO and PCX

    - **OpenDocument**:

        ODS (spreadsheets) and ODT (word processing)

    - **Certificate**:

        CRT, CRL, CER and JSON

    - **Legacy Microsoft Visio** (prior to Visio 2010):

        VSD

    - **Contact** (vCard):

        VCF

- **Password-free sanitization** – The user can now decide during the sanitization of password-protected files if the sanitized version of the file will be encrypted or not.

- **Multiple password support** – Sanitization of a file that has multiple passwords is now possible.

- **New Incidents Report** – The user can generate a report for a specific time period that will show all the relevant information regarding the sanitized items that had one or more suspicious elements inside.

- **Syslog TLS v1.2** – The customer can configure SIEM Syslog messages to use the TLS v1.2 protocol.

2 Resolved Issues

The following open issues have been resolved in this latest version release:

- Resolved an issue where a watermark disappeared on some PDF files after sanitization.

- Resolved an issue where some Legacy Excel files became corrupted after sanitization.

- Resolved an issue where Audit events were displayed without user name when using SAML.

3   Deprecated Features

We are pleased to announce that no features have been deprecated in version 9.7.
